LEARNING OBJECTIVES

21st ANNUAL FUNDAMENTALS OF SURGICAL RESEARCH COURSE
At the conclusion of this course, attendees will be able to:
- Describe the key activities of a successful surgeon scientist
- Describe the essential points in a scientific abstract, paper, and research application
- Differentiate between outcomes, clinical, and education research
- Describe the new molecular strategies that can be applied towards surgical research
- Map out a strategy for achieving balance in both work and home life

6th ANNUAL CAREER DEVELOPMENT COURSE
At the conclusion of this course, attendees will be able to:
- Discover the excitement and opportunities of being an academic surgeon
- Develop a strategy for balancing clinical and academic responsibilities
- Critically evaluate an offer for an academic position
- Identify appropriate mentors for each aspect of their academic career
- Design an effective strategy for getting promoted
- Understand what opportunities there are in basic science, translational, and outcomes research
- Get started in writing a grant proposal such as a career development grant
- Recognize the opportunities in surgical education
- Develop a strategy for balancing personal and professional time
- Understand the importance of maintaining personal health
- Share in developing the vision for the future academic surgeon
