Dorry Segev, MD, PhD
Professor of Surgery and Epidemiology
Associate Vice Chair, Department of Surgery
Johns Hopkins University
Disclosure

• I will show you photos that I have taken
  They have nothing to do with the content
  They are to distract you from your pain
• I might be a little cynical
• I might say “bad words”
• I might say something useful
• These are just some of the lessons I’ve learned
  (mostly the hard way)
K is easy, R is hard
Read a bunch of Rs...
style, strategy, secret handshakes
Also ask for the Summary Statements
Read the Program Announcement. All of it.
Talk to Program Officers before, during, after
Don’t expect collaborators (or administrators) to do ANYTHING. This is YOUR baby.
Parent R01 vs Other R01s
The ESI Advantage
Multiple R01s
Get Help (Mentor, Peers)
K->R Starts Much Earlier Than You Think
Significance
Feasibility
Spoonfeed the reviewers.
It doesn’t end with submission. Follow it through. Continue the work.
The Summary Statement is a conversation to improve your science, not a critique.
You WILL get rejected.
You WILL get funded.
Persist.
